Description :

PDF-a1dde | Recent droughts in Africa and elsewhere in the world, from China to Peru, have serious implications for food security and grave consequences for local and international politics. The issues do not just concern the plight of African peoples, but also our global ecological future. Global climatic changes become manifest initially in regions that are marginal or unstable. Africa's Sahel zone is one o... *Droughts, Food and Culture: Ecological Change and Food Security in Africa's Later Prehistory*
